## WHO WE ARE

Adaptivestack Technologies is a software company comprised of a network of technology and business professionals spanning both federal and private sector markets. Our team prides itself in delivering the innovative products on time and within budget. Our experience in healthcare, defense and other areas gives us the capability to go into a project and make significant impact in a short period of time. Our capabilities are directly related to our company name, **AdaptiveStack**. We pride ourselves on being **Adaptive** to technologies, software development lifecycles, processes and procedures within a given business domain, whether it be federal or private, utilizing any technology **Stack**.

## VALUES

Adaptivestack Technology's dedication to our core values is what truly separates us from the competition. As a company, our customers come first, we are ethical and professional and focus on continuous improvement.

When this approach is followed, business and personal success is inevitable.

While most businesses focus first on strategy and profits, at Adaptivestack Technologies they are secondary to our people and our culture. By following our core values, we excel in

## MISSION

To be the providers of technical strategies and services, which deliver long term benefits, based upon our clients key business requirements  
Our evolved solutions are economical, efficient, durable, flexible and allow organizations to respond rapidly to both market and customer needs.

## FEDERAL HEALTHCARE

It has been an honor and privilege to deliver products and services that have been beneficial to our veterans. Adaptivestack's personnel have broad, hands on, experience delivering software across the Department of Veterans Affairs (VA). Our experience and guidance in Agile methodologies allows us to align seamlessly the Veteran-focused Integration Process (VIP) Lean-Agile framework and DevSecOps. Our mission is to leverage technology and innovation to transform the delivery of care for Veterans, their families and Caregivers with unified, integrated and personalized virtual services that connect them with a state-of-the-art system of care.

## Modeling & Simulation

Adaptivestack's personnel have extensive experience in the Constructive and Virtual domains within the United States Department of Defense (DoD) arena. Our capabilities range from research and analysis to software development for Live, Virtual, and Constructive Systems. We have hands on experience in DoD training programs such as:

- U.S. Army's One Semi-Automated Forces (OneSAF)
- U.S. Army's Synthetic Environment Core (SCORE)
- U.S. Army's Aviation Combined Arms Tactical Trainer (AVCATT) Suite 16
- U.S. Army's Enhanced Dynamic Geo-social Environmental Platform (EDGE-P)
- U.S. Army's Common Driver Trainer (CDT)
- U.S. Marine's Combined Arms Command & Control Trainer Upgrade System (CACCTUS)

## CORE CAPABILITIES

**PMO SUPPORT:** We offer a full range of PMO capabilities. From project management, contract oversight, budgeting and reporting, we have the ability to quickly set up and staff a PMO or deliver support services to existing PMO operations. Our approach is based on our experience delivering IT program and project management services that incorporate industry best project management practices led by our PMP and Agile certified professionals. We perform the critical role of managing our clients' projects while complying with their service level agreements (SLAs).

- Program Management Office Support
- Project Management
- Business Process Analysis
- Business Process Re-engineering
- Requirements Management and Analysis
- Financial Management Services

## SOFTWARE DEVELOPMENT / MODERNIZATION:

Our Software Development services provide our clients with full lifecycle development services, starting from requirements gathering to system deployment. Our greatest strong suit is our technical expertise in Agile system and software development. We have experience ranging from large, interoperable U.S. Department of Defense (DoD) training systems to web based Federal Healthcare applications.

## AGILE GOVERNANCE AND GUIDANCE:

At Adaptivestack Technologies, we have over a decade of experience in Agile project execution using a variety of Agile Methodology principles. Where are proficient in migrating and teaching teams to properly utilize these techniques to maximize project gains. We offer the following:

- Agile Transformation
- Agile Training
- Agile Software Training
- Agile Team Augmentation

## CORE CAPABILITIES CONTINUED

### Big Data & Data Analytics

Adaptivestack Technologies is here to help our clients navigate the Big Data landscape. Our team's Big Data Solutions, Expertise, and Training will solve your Big Data challenges. Our Big Data Services transform organizational knowledge into insights for more informed and timely business decisions with the best possible return on investment.

Big Data analytical solutions that can be easily customized to the customer's specific business needs and seamlessly integrated into their existing infrastructure. We tailor our services to your exact business requirements in order to get the full benefits of the developed Big Data infrastructure.

We offer a comprehensive suite of data services designed to enhance interoperability and promote evidence-based decision-making. We leverage machine learning and predictive analytics to enable our customers to use their data to identify preventive business interventions that reduce overall risk and improve mission effectiveness. Our passionate team of data experts brings experience across a wide array of data science, visualization and business intelligence tools as well as industry standards to deliver secure, reliable, scalable data-driven solutions including:

- Data Architecture
- Data Warehousing
- Master Data Management
- Data Science
- Business Intelligence (BI)
- Data Visualization
- Artificial Intelligence / Machine Learning (AI/ML)
- Internet of Things (IoT)

### Digital Services

We offer a suite of playbooks, automation tools, and methodologies through our Agile Delivery Centers to drive rapid development of custom applications. Using an enterprise engineering maturity reference framework, we guide, measure, and continuously improve our delivery processes, drawing from Agile Scrum, Kanban, SAFe, and US Digital Services Playbook best practices to enable our clients to achieve their business goals. Our certified SMEs combine design thinking with robust engineering and cyber practices to collaborate with stakeholders and end users as a unified team, delivering intuitive, secure, scalable applications that improve user experience and adoption.

- Human Centered Design (HCD)
- User Experience / Customer Experience (UX/CX)
- Agile Playbooks
- DevSecOps
- Continuous Integration / Continuous Deployment
- Test-Driven Development (TDD)

### Cloud Services

Cloud Services such as Microsoft Azure, Amazon Web Services, Google Apps, and Salesforce have been proven to benefit companies by saving costs and allowing infrastructure to work better and faster. Adaptivestack's engineers can help your company quickly adopt cloud technologies. We provide cloud and infrastructure strategies to optimize application and mission performance, leveraging leading-edge cloud architectures, automation frameworks, and governance best practices. Our expertise in Cloud and virtualization technologies, information assurance and security, and federal policies and standards offers our clients a customized approach for architecting best-fit infrastructure solutions for scalability and cost optimization to successfully migrate to and operate in the Cloud. Our capabilities include:

- Hybrid & Multi-Cloud Solutions
- Cloud Strategy
- Migration
- Cost Optimization
- Governance
- Operations Management
- Security
- Automation & Orchestration
